Aguilar-Ríos, G., see Armendariz, H. 29

Araya, P., Berrios, J.P. and Wolf, E.E.
Activity and infrared studies during carbon monoxide oxidation over bimetallic palladium–rhodium/silica catalysts 17

Armendariz, H., Aguilar-Ríos, G., Salas, P., Valenzuela, M.A., Schifter, I., Arriola, H. and Nava, N.
Oxidative dehydrogenation of n-butane on iron–zinc oxide catalysts 29

Arriola, H., see Armendariz, H. 29

Berrios, J.P., see Araya, P. 17

Boudouvas, D., see Efstathiou, A.M. 1

Deng, J., see Yang, J. 73

deVries, J.E., see Schmitz, P.J. 59

Duchet, J.-C., see van Gestel, J. 143

Efstathiou, A.M., Boudouvas, D., Vamvouka, N. and Verykios, X.E.
Kinetics of methane oxidative coupling on zinc-doped titanium oxide 1

Fierro, J.L.G., see Guerrero-Ruiz, A. 81

Fierro, J.L.G., see Medina, F. 131

Guerrero-Ruiz, A., Rodriguez-Ramos, I., Fierro, J.L.G. and Jimenez Lopez, A.
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81

Hoost, T.E. and Otto, K.
Temperature-programmed study of the oxidation of palladium/alumina catalysts and their lanthanum modification 39

Jimenez Lopez, A., see Guerrero-Ruiz, A. 81

Leglise, J., see van Gestel, J. 143

Medina, F., Salagre, P., Sueiras, J.E. and Fierro, J.L.G.
Characterization and catalytic properties of several potassium-doped iron–nickel catalysts 131

Nava, N., see Armendariz, H. 29

Otto, K., see Schmitz, P.J. 59

Otto, K., see Hoost, T.E. 39

Salas, P., see Armendariz, H. 29

Schifter, I., see Armendariz, H. 29

Schmitz, P.J., Otto, K. and deVries, J.E.
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59

Shinoda, S., see Yamakawa, T. L1

Sueiras, J.E., see Medina, F. 131

Tsai, P.-K., see Yamakawa, T. L1

Valenzuela, M.A., see Armendariz, H. 29

Vamvouka, N., see Efstathiou, A.M. 1

van der Pol, A.J.P.H. and van Hooff, J.H.C.
Parameters affecting the synthesis of titanium silicalite 1 93

van der Pol, A.J.P.H., Verduyn, A.J. and van Hooff, J.H.C.
Why are some titanium silicalite-1 samples active and others not? 113

van Gestel, J., Leglise, J. and Duchet, J.-C.
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143

van Hooff, J.H.C., see van der Pol, A.J.P.H. 93

van Hooff, J.H.C., see van der Pol, A.J.P.H. 113

Verduyn, A.J., see van der Pol, A.J.P.H. 113

Verykios, X.E., see Efstathiou, A.M. 1

Wolf, E.E., see Araya, P. 17

Yamakawa, T., Tsai, P.-K. and Shinoda, S.
Acetic acid and methyl acetate formation from methanol alone over ruthenium(II)–tin(II) cluster complex catalysts supported on copper-containing oxide L1

Yang, J., Deng, J., Yuan, X. and Zhang, S.
Rhenium as a promoter for ethylene epoxidation 73

Yuan, X., see Yang, J. 73

Zhang, S., see Yang, J. 73

Subject Index

Acetic acid
Acetic acid and methyl acetate formation from methanol alone over ruthenium(II)–tin(II) cluster complex catalysts supported on copper-containing oxide L1

Acidity
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81

Adiponitrile
Characterization and catalytic properties of several potassium-doped iron–nickel catalysts 131

6-Aminohexanenitrile
Characterization and catalytic properties of several potassium-doped iron–nickel catalysts 131

Bimetallic catalysts
Activity and infrared studies during carbon monoxide oxidation over bimetallic palladium–rhodium/silica catalysts 17

Binding energy
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59

Brønsted acidity
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81

Butane
Oxidative dehydrogenation of n-butane on iron–zinc oxide catalysts 29

Carbon monoxide oxidation
Activity and infrared studies during carbon monoxide oxidation over bimetallic palladium–rhodium/silica catalysts 17

Catalyst characterization (BET, XPS, XRD)
Characterization and catalytic properties of several potassium-doped iron–nickel catalysts 131

Catalyst characterization (electrical conductivity)
Kinetics of methane oxidative coupling on zinc-doped titanium oxide 1

Ceria/alumina
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59

Chromia pillaring
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81

Cobalt–molybdenum/alumina
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143

Copper
Acetic acid and methyl acetate formation from methanol alone over ruthenium(II)–tin(II) cluster complex catalysts supported on copper-containing oxide L1

Crystallization
Parameters affecting the synthesis of titanium silicalite 1 93

Diffusion limitations
Why are some titanium silicalite-1 samples active and others not? 113

2,6-Dimethylaniline
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143

Dispersion
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59

Disproportionation
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143

Ethylene epoxidation
Rhenium as a promoter for ethylene epoxidation 73

Hydrodenitrogenation
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143

Hydrogen sulphide
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143
Hydrogenation
Characterization and catalytic properties of several potassium-doped iron–nickel catalysts 131
Hydrotreating catalysts
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143
Infrared
Activity and infrared studies during carbon monoxide oxidation over bimetallic palladium–rhodium/silica catalysts 17
Iron-zinc oxide
Oxidative dehydrogenation of n-butane on iron–zinc oxide catalysts 29
Kinetics
Kinetics of methane oxidative coupling on zinc-doped titanium oxide 1
Kinetics
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143
Lanthana
Temperature-programmed study of the oxidation of palladium/alumina catalysts and their lanthanum modification 39
Lewis acidity
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81
Metal-support interaction
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Methane conversion
Kinetics of methane oxidative coupling on zinc-doped titanium oxide 1
Methanol
Acetic acid and methyl acetate formation from methanol alone over ruthenium(II)–tin(II) cluster complex catalysts supported on copper-containing oxide L1
Methyl acetate
Acetic acid and methyl acetate formation from methanol alone over ruthenium(II)–tin(II) cluster complex catalysts supported on copper-containing oxide L1
Monolithic catalysts
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Mossbauer spectroscopy
Oxidative dehydrogenation of n-butane on iron–zinc oxide catalysts 29
Nickel
Characterization and catalytic properties of several potassium-doped iron–nickel catalysts 131
Nickel–molybdenum/alumina
Effect of hydrogen sulphide on the reaction of 2,6-dimethylaniline over sulphided hydrotreating catalysts 143
Oxidation
Oxidative dehydrogenation of n-butane on iron–zinc oxide catalysts 29
Oxygen adsorption
Rhenium as a promoter for ethylene epoxidation 73
Palladium oxide
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Palladium sintering
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Palladium-rhodium/silica
Activity and infrared studies during carbon monoxide oxidation over bimetallic palladium–rhodium/silica catalysts 17
Palladium/alumina
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Palladium/alumina
Temperature-programmed study of the oxidation of palladium/alumina catalysts and their lanthanum modification 39

Particle size
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Phenol hydroxylation
Why are some titanium silicalite-1 samples active and others not? 113
2-Propanol decomposition
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81
Rhenium
Rhenium as a promoter for ethylene epoxidation 73
Ruthenium-tin
Acetic acid and methyl acetate formation from methanol alone over ruthenium(II)–tin(II) cluster complex catalysts supported on copper-containing oxide L1
Silver
Rhenium as a promoter for ethylene epoxidation 73
Structure sensitivity
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Synthesis (zeolites)
Parameters affecting the synthesis of titanium silicalite 1 93
Temperature-programmed desorption
Temperature-programmed study of the oxidation of palladium/alumina catalysts and their lanthanum modification 39
Temperature-programmed oxidation
Temperature-programmed study of the oxidation of palladium/alumina catalysts and their lanthanum modification 39
Tin
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81
Titanium oxide
Kinetics of methane oxidative coupling on zinc-doped titanium oxide 1
Titanium silicalite-1
Parameters affecting the synthesis of titanium silicalite 1 93
Titanium silicalite-1
Why are some titanium silicalite-1 samples active and others not? 113
TS-1
Parameters affecting the synthesis of titanium silicalite 1 93
TS-1
Why are some titanium silicalite-1 samples active and others not? 113
X-ray photoelectron spectroscopy
X-ray photoelectron spectroscopy investigation of palladium in automotive catalysts: Binding energies and reduction characteristics 59
Zeolites
Parameters affecting the synthesis of titanium silicalite 1 93
Zeolites
Why are some titanium silicalite-1 samples active and others not? 113
Zinc
Kinetics of methane oxidative coupling on zinc-doped titanium oxide 1
Zirconium
Catalytic activity of layered α-(tin or zirconium) phosphates and chromia-pillared derivatives for isopropyl alcohol decomposition 81
